

Anthony M. DiCesare, DDS Anthony N. DiCesare, DDS

• *Periodontics*

"We are pleased to be honored as *New Jersey Monthly* Top Dentists for the sixth consecutive year," says Dr. Anthony N. DiCesare, who shares the spotlight again with his son, Dr. Anthony M. DiCesare. As periodontal specialists, this duo's reputation has been built on developing relationships with many fine restorative dentists and gaining the trust of devoted patients who have been coming to them for decades. The practice focus has always hinged on educating dentists and patients in the community about the importance of periodontal and dental health.

These skilled doctors have expanded their services over the last several years to include full mouth tooth replacement with dental implants, a procedure known as hybrid dentures. In 2014, they opened the only center dedicated to this procedure in Ocean County. "That was such a rewarding experience that we are happy to announce a new location opening adjacent to our existing Red Bank office," says Dr. Anthony M. DiCesare. "It's great to be able to treat people with debilitated teeth and then see them smile confidently for the first time in years."
